PROFESSIONAL SUMMARY

Data Analytics graduate student specializing in AI Engineering and Machine Learning, seeking a **co-op placement** in Data Science, Data Analytics, AI Engineering, or Business Intelligence. Brings 6+ years of combined experience in supply chain analytics, business intelligence, financial analysis, AI model development, and data-driven operations, currently applying that background part-time as a **Supply Chain Planner** at **Wonderbrands**. Proficient in Python, SQL, R, Power BI, Tableau, and cloud platforms (AWS, Azure, GCP), with hands-on experience in LLM fine-tuning, ETL pipeline development, and AI integration into operational workflows.

EDUCATION

Master of Data Analytics

Sep 2025 – Present (Expected March 2027)

Specialization: AI Engineering & Machine Learning

University of Niagara Falls, Niagara Falls, ON

Post Graduate Diploma in Business Analysis

April 2024

Coursework: Project Management · Data Analysis · ERP Implementation · Project Planning

Fanshawe College, London, ON

Bachelor of Engineering — Mechanical Engineering

June 2018

WES Verified - Canadian Equivalency

Anna University, India

PROFESSIONAL EXPERIENCE

Supply Chain Planner (Part-time)

Jan 2026 – Present

Wonderbrands Inc. Etobicoke, ON

- Manage demand and supply planning for 5+ product categories across Canada -- coordinating 11+ manufacturing facilities, 8+ DCs, and regional depots to maintain a 99%+ fill-rate target.
- Build and maintain Power BI dashboards on daily SAP exports, delivering real-time KPI visibility (on-time delivery, inventory turns, forecast accuracy, DC throughput) to the planning team and weekly operations reviews.
- Integrate LLM-assisted analysis into daily planning workflows, reducing supply-deviation investigation turnaround by ~30% and accelerating escalation of at-risk SKUs.
- Coordinate daily across manufacturing, DCs, depots, and logistics partners to resolve scheduling conflicts and ensure on-time dispatch of high-velocity SKUs during peak demand periods.
- Contributing to a process improvement initiative targeting a 15% reduction in ONT/QUE-region Bakeries & DC overstock through tighter inventory signal monitoring and forecast-to-plan alignment.

General Utility (Part-time)

Nov 2025 – Dec 2025

Wonderbrands Inc. Carrier Drive, ON

- Verified SKUs, manifests, and process orders in SAP across multi-customer outbound shipments, contributing to a ~20% reduction in shipment discrepancies over 6 weeks through accurate documentation and proactive variance flagging.
- Developed hands-on knowledge of Wonderbrands' SAP environment, distribution network, and production flow - enabling a seamless transition into the Supply Chain Planner role within 6 weeks.

AI Model Training & Data Specialist (Freelance) | Stellar AI

Aug 2025 – Jan 2026

- Curated 5,000+ annotated prompt–response pairs across financial reasoning, code generation, and data-analysis domains for RLHF training pipelines; outputs integrated into two successive model versions.
- Evaluated LLM outputs for accuracy, logical coherence, and safety; systematic error identification contributed to measurable benchmark improvements across targeted task categories.

AI Data Specialist (Freelance) | TELUS Digital AI Data Solutions

Aug 2025 – Nov 2025

- Annotated and validated 3,000+ multimodal samples (text, tabular, and structured data) for commercial AI training pipelines, sustaining a quality acceptance rate above 96% across all assigned batches.
- Delivered structured QA feedback reports on AI outputs in document classification and entity extraction domains, resulting in an estimated 25% reduction in annotation rework within the assigned project track.

Prompt Engineer / AI Model Trainer (Freelance) | Outlier

Jun 2024 – Aug 2025

- Designed and evaluated 800+ expert-level prompts across data science, mathematics, coding, and analytical reasoning over 15 months; RLHF assessments guided reward modeling for 3 successive model releases.
- Authored reusable prompt engineering templates adopted as internal workflow standards, reducing new-evaluator task-completion time by ~35% and improving cross-team quality consistency.

Business Data Analysis -- Executive

April 2020 – April 2022

Togslive Solutions Pvt Ltd., IN

- Deployed 6+ Power BI dashboards integrating live SAP and ERP data, compressing the weekly KPI reporting cycle from 5 days to same-day delivery for senior leadership.
- Built SQL ETL pipelines processing 100,000+ records/month from legacy systems into a centralized warehouse, cutting data-prep time by ~60% and supporting a zero-data-loss ERP migration.
- Developed Python and Excel demand-forecasting models that improved forecast accuracy by 18%, underpinning ~\$1.8M in annual procurement decisions and reducing overstock write-offs by ~12%.
- Integrated 3 operational systems (logistics, inventory, production) into a unified data pipeline, enabling end-to-end supply chain traceability and eliminating ~8 hrs/week of duplicate reconciliation.
- Identified 4 critical process inefficiencies through root-cause data analysis, driving a 15% improvement in on-time delivery performance over 18 months.

Operations Analytics -- Executive

Aug 2018 – April 2020

Togslive Solutions Pvt Ltd., IN

- Analyzed 50,000+ logistics records monthly to surface inventory movement patterns, delivery delays, and capacity bottlenecks; findings drove operational changes that cut average lead time by 2 days (~14%).
- Built an Excel analytics toolkit (automated pivot dashboards, variance scorecards, performance heatmaps) used daily by 10+ operations staff, reducing manual reporting effort by ~40%.
- Led data migration and validation for 3 ERP modules — mapping legacy data structures and conducting reconciliation testing to ensure complete cut-over with no historical data loss.
- Standardized KPI definitions and reporting frameworks across logistics, procurement, and production, establishing a unified analytical foundation for all subsequent BI and forecasting work.

TECHNICAL SKILLS

Programming & Analytics: Python (*pandas, NumPy, scikit-learn, Matplotlib, Seaborn, statsmodels*), SQL, R, SPSS

Machine Learning & AI: Supervised & Unsupervised Learning, Regression, Classification, Clustering, Time-Series Forecasting, NLP, LLM Fine-tuning, Prompt Engineering, RLHF, Generative AI (Claude, GPT)

BI & Visualization: Power BI (*DAX, Data Modeling*), Tableau, Advanced Excel (*Power Query, Pivot Tables, XLOOKUP*)

Databases & Data Engineering: MySQL, SQL Server, MongoDB, ETL Pipeline Design, Data Cleaning, Feature Engineering, Exploratory Data Analysis (EDA)

Cloud & Tools: AWS (S3, EC2), Microsoft Azure (Azure ML), GCP, Git, GitHub, Jupyter Notebook, SAP ERP, CRISP-DM
